About

I am a full-stack web developer with nearly 10 years experience. I have worked on projects of all different sizes for companies large and small. I really enjoy learning from new people and take pride in my work.

Work

Freelance 2007 — Now

Full-stack Web Developer

My understanding of the complete web "stack" allows me to adapt to any problem. I am comfortable working with old and new systems and always strive to make improvements wherever I can. I am most comfortable in an agile setup and am able to prototype ideas quickly so that decisions can be made around them.

Volunteer

Coding Coop 2015 — Now

Mentor

Offered mentorship through a coding coop program.
